DATA2041 APPLIED DATA VISUALISATION: MODULE HANDBOOK, AUTUMN 2026

School of Computing, University of Eastbridge. Module leader: Dr Imogen Achterberg (i.achterberg@eastbridge.example). Teaching runs for eleven weeks from Monday 28 September 2026. Lectures are on Mondays at 10am in the Hollins Building, room 2.14, and lab sessions are on Thursdays at 2pm in the Ada Lab.

1. Aims. 1.1 The module teaches you to design charts and dashboards that are accurate, accessible and honest about uncertainty. 1.2 You will work with real public datasets in Python and present your findings to a non-specialist audience.

2. Attendance. 2.1 You are expected to attend every lecture and lab. 2.2 If you miss a lab, you must catch up on the lab exercise before the next lab session, using the notes on the module page. 2.3 If you will miss more than two consecutive weeks, you must tell the module leader by email.

3. Reading. 3.1 Before the first lecture, read chapters 1 and 2 of the set text, Fundamentals of Honest Charts. 3.2 Each week’s reading is listed on the module page and should be done before that week’s lecture.

4. Assessment. 4.1 Coursework 1 is a project proposal of no more than 800 words, worth 10 per cent of the module mark. You must submit it through the coursework portal by 5pm on Friday 16 October 2026. 4.2 Coursework 2 is a draft dashboard with a short write-up, worth 20 per cent. You must submit the draft through the portal by 5pm on Friday 6 November 2026. 4.3 After the draft deadline you will be sent two classmates’ drafts to review. You must submit both peer reviews within seven days of receiving them. Peer reviews are not marked but are required to pass the module.

4.4 The final project, worth 50 per cent, is a finished dashboard with a report of no more than 2,500 words. You must hand it in through the portal by 5pm on Friday 11 December 2026. 4.5 The remaining 20 per cent is a ten-minute presentation in week 11. You must book a presentation slot on the module page by Friday 20 November 2026; students who do not book will be given a slot.

5. Extensions and late work. 5.1 If you need more time because of illness or other circumstances outside your control, you must request an extension through the portal at least 48 hours before the deadline. 5.2 Work submitted late without an agreed extension loses 5 marks for each working day it is late, up to five working days, after which it receives a mark of zero.
